

STRATEGIC AND
CONSULTING SERVICES

MyCISO Service

*Implementing Smart Security
Strategies to Secure Your Assets*

The Need

Due to the intensive commercial collaboration amongst hackers, they share knowledge and cyber attack instruments easily and anonymously. It is as easy to purchase a piece of malware off the Darknet as it is to shop for a toothbrush. This prosperous and user-friendly market has led to a rapid emergence of cyber breach incidents. Enterprises need a proactive defense program that will scale and evolve quickly along with the rapid changes in the cyber threat landscape

The Solution

A resource with years of hands-on experience as a CISO in commercial organizations is allocated to assist the enterprise in implementing a solid security program. This CISO provides guidance, expertise, and input on cyber security practices that best suit the organization's current security state, business needs and budget, and handles the practical actions required to implement the security program. The goal is to mature the organization's cybersecurity program and elevate its overall security posture

What to Expect

- I. **Holistic Risk Assessment** (with a Business Impact Analysis and Threat Modeling). Not included in service but increases speed and results
- II. **Tailored multi-year strategy road-map** – specific key security priorities and implementation techniques: advanced and sensitive detection methods, multi-faceted countermeasures, intelligence insights, response program, deceptive techniques, offensive techniques, and more
- iii. **Cybersecurity risk register** - Tracking all key risks and ensuring progress

HolisticCyber – Defending what matters
